🛡 1st Lieutenant Fighter Pilot

Profile

Bringing military precision and tactical thinking to software development. From cockpit to code, I transform complex challenges into elegant solutions.

As a current Lebanese Air Force fighter pilot with extensive training in both Lebanon and the United States, I bring a unique blend of military precision and technical expertise to software development.

My journey began in mechatronics engineering, where I first discovered my passion for programming through C, C++, C#, and Assembly. This foundation, combined with my military career, has shaped my approach to problem-solving and system architecture.

Today, I leverage my experience in high-pressure environments and complex systems to create robust, efficient software solutions.

Education

2002 – 2017 Tripoli, Lebanon	Lebanese Baccalaureate Certificate of Secondary Education in General Sciences <i>Rawdat El Fayhaa Secondary School</i>
2017 – 2018 Balamand, Koura, Lebanon	2 Semesters in Mechatronics Engineering <i>University of Balamand - Issam Fares Faculty of Technology</i>
2018 – 2021 Beirut, Lebanon	Bachelor of Military Sciences <i>Lebanese Military Academy</i> specialization: airforce fighter pilot
